

Basic Science: Animal Models for Delirium

8:00 – 8:12	Welcome and Overview (12 mins)	Fiona Harrison – Vanderbilt University Medical Center
8:15 – 9:30	Challenges in Using Animal Models for Delirium (1 hr 15 mins)	Julie Bastarache - Vanderbilt University Medical Center Colm Cunningham – Trinity College, Dublin Shiqian Shen – Harvard Medical School Niccolo Terrando – Duke University
9:30 – 9:45	Break	
9:45 – 10:30	Translational Markers in Animal Models (45 mins)	Joe Hippensteel – University of Colorado Julie Bastarache - Vanderbilt University Medical Center
10:30 – 11:30	Trainee Lightning Talks (60 mins)	
11:20 – 11:45	Panel discussion and open floor for Q&A (25 mins)	Fiona – Chair Colm Cunningham, Shiqian Shen, Niccolo Terrando
11:50 – 12:00	Closing Remarks (10 mins)	

Lightning talks.

Calling all trainees! We are seeking submissions for lightning talks at the pre-conference workshop "Animal Models for Delirium". This is an excellent opportunity to share your work and research with colleagues and experts in the fields of basic and translational research in delirium.

We welcome nominations from mentors or PIs, as well as self-nominations from trainees. If selected, you will be given approximately 10 minutes to present your work in a concise lightning talk format.

To submit, please provide a title and a brief 250-word abstract outlining your proposed topic. The deadline for submissions is May 16th. Please send to Fiona.Harrison@VUMC.org.

This is a fantastic chance to gain experience presenting in a supportive environment and connect with others in the delirium research community. We look forward to reviewing your submissions!
